KAZAKHSTAN IN FIGURES

Kazakhstan has a large territory and is located at the confluence of Europe and Asia, which is why transport infrastructure plays an important role in the development of the economy of Kazakhstan and the region as a whole

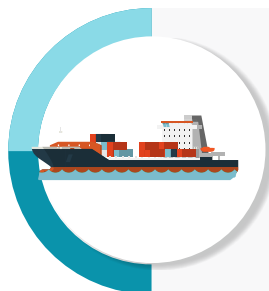

The length of the railway in Kazakhstan exceeds **16 thousand km**, connecting the railway structures with neighboring countries

The length of public roads exceeds **96 thousand km**. Roads of international and national significance exceed **24 thousand km**. As part of the project of the international transit corridor "**Western Europe - Western China**", Kazakhstan has built and reconstructed **2787 km** of roads, including 1391 km of category I (4 lanes), 1061 km of category II (2 lanes).

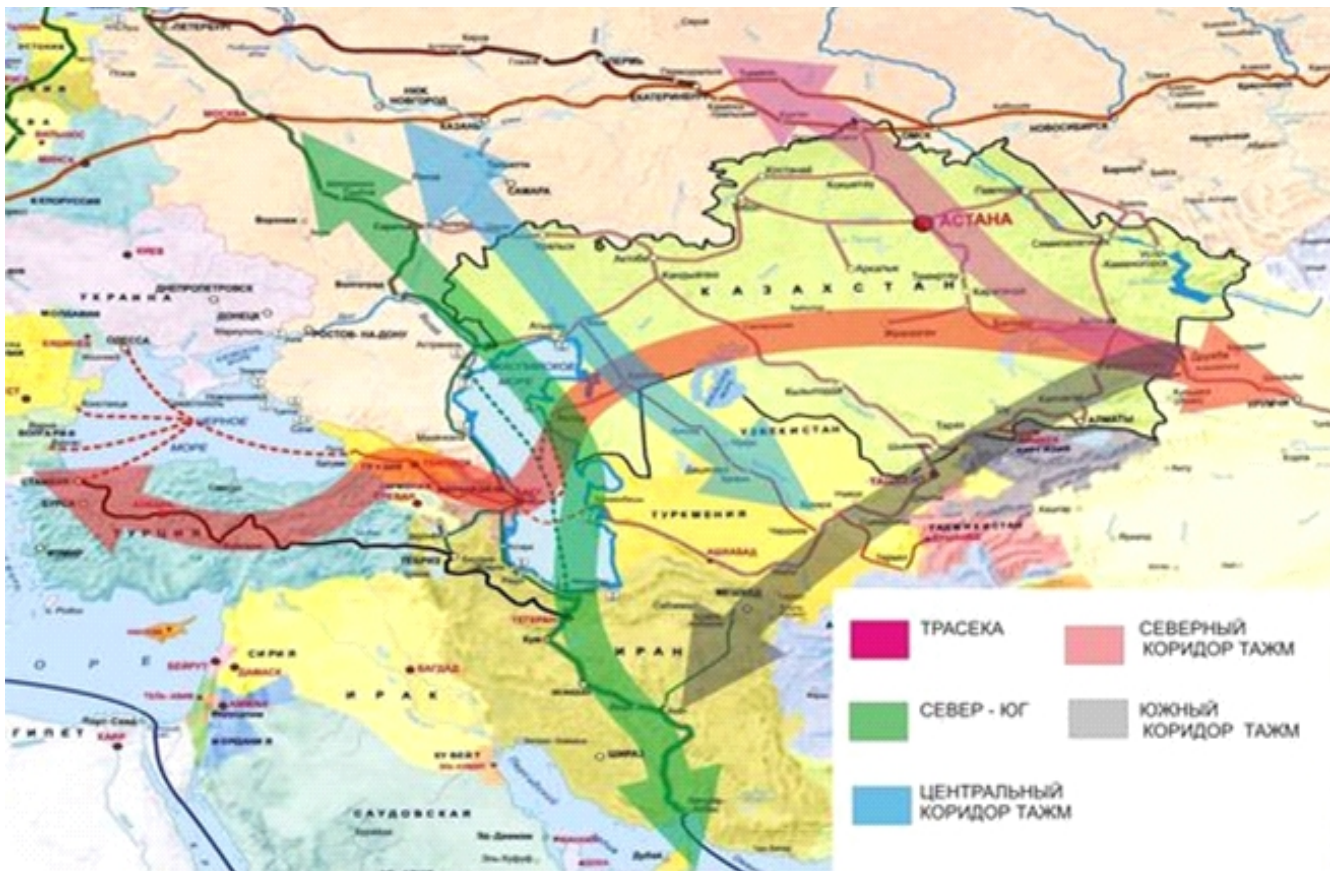

Kazakhstan has 24 main airports (72 air corridors), 17 of which are allowed to serve international flights. In addition the list of regional airports includes 19 small airports

Since 2014, the Kazakh-Chinese terminal in the **port of Lianyungang** has been successfully operating. A modern **Dry port in the Khorgos – Eastern gate FEZ** has been created and operates on the border with China. The dry port in technological connection with the "**Western Europe-Western China**" highway, high-speed railway service, as well as port infrastructure in the Caspian Sea (**Aktau and Kuryk ports**) forms a powerful transport and logistics hub that allows for efficient distribution of cargo traffic from China to Europe, as well as Central Asian countries, Turkey and the Persian Gulf countries.

## EXPORT PRODUCTS OF KAZAKHSTAN

### International transport corridors pass through Kazakhstan, such as:

- Trans-Asian Railway Northern corridor:** Western Europe - China, the Korean Peninsula and Japan via Russia and Kazakhstan (on the section Dostyk-Aktogay-Sayak-Mointy-Astana – Petropavlovsk (Presnogorkovskaya).
- Trans-Asian Railway Southern corridor:** South-Eastern Europe - China and South-Eastern Asia via Turkey, Iran, Central Asian countries and Kazakhstan (on the section Dostyk - Aktogay - Almaty - Shu - Arys - Saryagash).
- TRACECA:** Eastern Europe - Central Asia via the Black sea, Caucasus and Caspian sea (on the Dostyk – Almaty - Aktau section).
- North-South:** Northern Europe - Persian Gulf countries through Russia and Iran, with Kazakhstan's participation in areas of the sea port Aktau – Ural regions of Russia and Aktau - Atyrau.
- Besides the directions involved in the formation of the main transcontinental routes, it is necessary to note the **Central corridor of Trans-Asian railway**, which is important for regional transit traffic in the direction of Saryagash-Arys-Kandahach-Ozinki.

These corridors can significantly reduce the distance in the East-West communication and the time of goods delivery.
